

Claims: I claim:

1. A case for cradling a camcorder-type liquid crystal display monitor, comprising:
 - (a) means for mounting said case to the inner retracted side of a driver's sunvisor of a motor vehicle,
 - (b) a window in said case for the monitor screen,
 - (c) material of a nature to insulate said monitor, whereby said sunvisor, when lowered, allows a driver easy, direct, close-range, sunlight-protected viewing of said monitor screen, as if the screen were a rear-view mirror, when used in conjunction with a video camera, to see to the view when the unaided view is obstructed.
2. An enclosure for a micro-video, pin-holed lens camera, comprising:
 - (a) means for mounting said enclosure on the reverse side of a plate, such as a license plate, at the rear of a trailer or motor vehicle, so that said camera can see through a predetermined-sized hole put in said plate,
 - (b) a pane of transparent material to cover and weather-proof the pin hole lens and lens housing,whereby said lens is protected from moisture, dirt, and scratches,
whereby said lens, lens housing, and contiguous internal camera components are protected from conduction of extremes of heat and cold from the weather-exposed plate, by the insulating intermediary pane,

whereby said mounted enclosure conceals the pin-hole camera to lessen the risk of vandalism, whereby said camera is located in the ideal position at the rear of a trailer or motor vehicle for viewing a backing, when used in conjunction with a monitor.
